PROFILE

Cloud Engineer experienced in **designing, deploying, and managing** Microsoft Azure infrastructure and cloud-native solutions. Skilled in Azure administration, infrastructure automation, and enterprise cloud migration, with a strong foundation in cloud architecture, networking, security, and virtualization. Passionate about building **scalable, reliable, and automation-driven solutions** while collaborating effectively with cross-functional teams to deliver successful cloud projects.

WORK EXPERIENCE

Capgemini — Cloud Analyst Engineer

Mumbai, India | Sep 2025 – Present

Core role: builds and automates Azure cloud infrastructure across two client engagements.

Project — MARTA (Metropolitan Atlanta Rapid Transit Authority)

Dec 2025 – May 2026

- Migrated **76 of 108** on-premises VMware virtual machines to **Azure VMware Solution (AVS)** using VMware HCX, achieving 70% project completion by designing and configuring the complete HCX migration environment, including **HCX Connector, Site Pairing, Network Profiles, Compute Profiles, and Service Mesh**.
- Executed end-to-end workload migrations using **Azure VMware Solution, VMware HCX, VMware vCenter, and Azure Migrate**, selecting **Bulk Migration, HCX vMotion, or Replication-Assisted vMotion** based on workload criticality and downtime requirements.
- Validated migrated workloads through **post-cutover health checks**, application testing, and issue resolution while collaborating with client stakeholders to plan migration waves, manage cutover activities, troubleshoot production issues, and secure production sign-offs for successful cloud transformation.

Project — Volvo

Jun 2026 – Present

- Deliver **L2 operational support** for enterprise Microsoft **Azure infrastructure**, ensuring **high availability**, incident resolution, and SLA compliance across production environments.
- Provision and administer **Azure Virtual Machines, Resource Groups, Azure Functions, App Services, Containers, and Service Principals**, including access management, secrets rotation, and Linux VM administration (sudo access, disk partitioning, and storage expansion).
- Manage **Azure SQL Database, PostgreSQL, and DFSQL** operations, including database provisioning, restoration, storage scaling, configuration changes, and connectivity troubleshooting.
- Support enterprise data platforms by configuring **Azure Data Factory (ADF) triggers**, ingestion pipelines, **MQ queues**, and integrations with **Informatica, Qlik Replicate, IBM CDC, Power BI, Wherescape, and SHIR**.
- Monitor and optimize **Azure infrastructure** through **VM provisioning, patching, disaster recovery, VM restoration, heartbeat monitoring, subscription quotas, IP utilization, and infrastructure health monitoring**, proactively resolving performance and reliability issues.

PROJECTS

WikiMedia Change Tracker · Spring Boot, Kafka, Zookeeper, DynamoDB · [GitHub](#)

Dec 2023 – Feb 2024

- Developed a **Spring Boot WebFlux** producer service to consume WikiMedia's live event stream and publish real-time events to **Apache Kafka**, enabling **high-throughput asynchronous data processing**.
- Built a decoupled **Kafka consumer** to process events and persist data to **Amazon DynamoDB**, implementing a fault-tolerant, event-driven architecture with reliable message delivery.
- Designed a scalable microservices architecture using **Apache Kafka, Zookeeper, and DynamoDB**, enabling independent service scaling, durable message storage, and resilience to producer/consumer failures.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering

Jan 2021 – Jul 2025

B.Tech, Computer Engineering, Honors in Intelligent Computing | **CGPA: 8.57**

Narayana e-Techno School — HSC (Class XII), **91.82%** | **Notre Dame School** — CBSE (Class X), **90.00%**

TECHNICAL SKILLS

Cloud & DevOps: Azure/Azure DevOps, AWS, GCP, Docker, Kubernetes, Linux, Terraform, Claude Code, Git/GitHub, Kafka, Power BI.

Languages: Java, Python, C/C++, SQL, MongoDB

RESEARCH PUBLICATIONS

- **Automated Feature Extraction From Version Control Artifacts in GitHub Repositories** — *International Conference on Engineering Technology Science and Management (ICETSM) 2024 (Accepted)* [\[Link\]](#)
- **Hybrid Predictive Modeling for F1 Race Outcomes: Random Forest & Graph Neural Networks** — *ComSIA 2025, Proceedings of ICCSIA, Springer* [\[Link\]](#)
